

The Valley School Rabbits Class Newsletter

January 2021

Rabbits' Families,

We had a wonderful time creating activities for our December themes like construction and holiday celebrations. We had a blast creating and building as well as learning about special family celebrations and traditions during that festive time. Now that December's fun is all done, January is here with the new year!

In January we are excited to learn about winter animals and look at photo cards together. The students will learn about "hibernation" when some of our special animals go to sleep all winter to wake up in the pretty Spring season! We will also focus on how the weather has changed throughout the season. In this winter season we will talk about all the fun and different activities we get to enjoy such as skiing, sledding and ice skating!

Look on your tablets! We will be taking lots pictures of our activities with the kids and what they create relating to our themes. From making beautiful snowflakes to stomping and dancing like a bear, we will certainly have loads of fun!

Keep the fun going at home!

Is there snow on the ground? Build, dig and play! If it is too cold to stay outside, snow problem! Bring the snow inside. Place the snow in a bucket and let your child play with the snow on a floor or table in your home. To manage mess, place a towel underneath the bucket as well. Most importantly, have fun! 😊

Thank You,

Ms. Lizzy and Ms. Lorraine
